Container Settings

General Settings · https://wpcoachify.com/docs/container-settings/

A container is an element that holds all your site contents. You can access the Container Settings via **Admin Dashboard > Appearance > Customize > General Settings > General > Container.**

The following are the settings that you can use to manage your site container.

Container Width – You can set the site container width for different devices via this option.

Fullwidth Centered Max-width – This setting sets the container width for a full-width centered layout.
