1. Download the installation file from here by clicking the **Buy now** button
2. Login to your WordPress website and go to **Appearance** > **Themes**
3. Click on **Add New** button and then click on **Upload Theme** button
4. Chose the .zip file you downloaded earlier **(in Step 1)**
5. Click on **Install Now** button
6. After the theme is installed, click on **Activate** button

Note: for Safari users (macOS): If you are using Safari to download the theme file, the file may unzip automatically. So, make sure your theme file is in .zip format. Here's how to stop Safari from automatically unzipping your .zip file.
